

GEO | HUNTSVILLE

Overview

Background: GEO Huntsville is one of three economic development and jobs initiatives sponsored by Mayor Tommy Battle (Energy Huntsville and Cyber Huntsville are the others).

Objective: GEO Huntsville is a collaborative effort among businesses, academic and government entities in our region to support workforce growth and economic development.

Huntsville/North Alabama Employment Base: Over 50 private companies and 15 government entities along with three universities are engaged in geospatial technology applications in Huntsville and North Alabama.

Job Opportunities: The U.S. Department of Labor's Educational Training Administration (DOLETA) has estimated that over 180,000 new jobs will be needed in geospatial technology over the next 10 years.

Huntsville's Opportunity:

1. **Geospatial intelligence (GEOINT)** is a core capability of the region's defense contractors and government agencies.
2. **Commercial earth observation satellite systems and unmanned aerial systems (UASs)** will become more pervasive as the DoD evaluates its need for commercial remotely sensed data.
3. **Building information modeling (BIM) and 3D visualization** for information systems related to emergency management and energy conservation are key capabilities of businesses in the region.

Event: GEO Huntsville Conference - November 8-9, 2012

Location: Davidson Center for Space Exploration, Huntsville, AL

Presentation and Sponsorship information: www.GEOHuntsville.com

Contact information: Joe Francica, GEO Huntsville Lead, *Directions Magazine*, joe.francica@directionsmag.com, 256-650-0205 or 256-509-3661
